Professional Summary

Results-driven and solution-oriented individual. To me, Computer Science is more about problem-solving, rather than just writing code. I take a keen interest in Java, Android Development, back-end programming and front-end frameworks.

Experience and Projects

Voice Alarm - Android App

Individual Project

- A *unique* alarm app.
- When the alarm goes off, it shows some text on the screen. The alarm can only be dismissed by reading that text into the phone's mic.
- Makes use of **Voice Recognition**, AsyncTask, **The Alarm manager**, and **integrated mySQL** in Java for saving user data.

2019-04 -
2020-06

Student Tutor

York University, Toronto, ON

- Tutored/Mentored students in EECS1012 at York Univ.
- Provided students with help in **Javascript, JQuery, HTML and CSS**
- Mentored in **labs** and class study materials

2019-01 -
2019-11
